PROFESSIONAL PORTFOLIO

IBRAHIM KHALIL AKIL

Full Stack Developer | Ethical Hacker | Red Team Practitioner

I build IoT and connected systems, deliver production software, and assess web, API, cloud-connected, and infrastructure attack surfaces. My work combines secure engineering, full-stack architecture, offensive security, and remediation-focused reporting.

7	10+	5+
Documented security assessments	Major software projects	Years in technology

CORE FOCUS

IoT & Connected Systems | Web & API Security | Red Team Assessments | Full-Stack Architecture | Authentication & Authorization | AI Integration

Montreal, Quebec, Canada | brhimakil@gmail.com | github.com/brahimakil

Professional Experience

Secure engineering, offensive security, and end-to-end product delivery.

Ethical Hacker & Red Team Practitioner

2026 - Present

Independent Security Assessments | Confidential Engagements

Security testing across web applications, APIs, cloud-connected systems, and exposed infrastructure.

- Tested authentication flows, multi-tenant authorization, REST and GraphQL APIs, JWT sessions, and file-handling workflows.
- Documented high-impact findings and produced evidence registers, severity ratings, negative tests, and remediation guidance.

Full Stack Developer - ChiBox

2026

Brainkets | Product Development

Worked with Brainkets as a developer of ChiBox, contributing directly to the product's implementation and delivery.

- Developed ChiBox as part of the Brainkets team and helped turn product requirements into a working digital platform.
- Contributed across architecture, feature implementation, integration, production delivery, and team collaboration.

Freelance Full Stack Developer

Early 2025 - Present

Self-Employed | Remote

Architecting and delivering complete solutions from discovery and budgeting through deployment and optimization.

- Led requirements analysis, technical specification, architecture, implementation, and client communication.
- Built and deployed secure applications with scalable APIs, real-time features, payments, media, and modern CI/CD.

Junior Mobile & Web Developer

2023 - Early 2025

Analytica Company | Full-Time

Delivered 5+ production websites while building a strong foundation in modern web and mobile engineering.

- Developed production-ready web experiences with clean architecture and responsive interfaces.

Security Assessments 01

Named targets with high-level finding classes only. No endpoints, payloads, credentials, personal data, or reproduction steps.

BrainSpace ERP

Web & API

Multi-tenant ERP/SaaS assessment covering tenant isolation, authentication boundaries, file handling, and exposed services.

OUTCOME

Confirmed full-system compromise

HIGH-LEVEL FINDING CLASSES

Auth Bypass | IDOR / BOLA | Path Traversal | Upload | Pre-Auth RCE | Data Exposure | Misconfiguration

VioletPro / FoodServiceLB

Multi-System

Assessment of connected business applications, administrative surfaces, and sensitive data-handling workflows.

OUTCOME

Confirmed full-system compromise

HIGH-LEVEL FINDING CLASSES

SQLi | Upload RCE | Broken Authorization | Stored XSS | Weak Crypto | Backup Exposure

Omega Software

API Security

Multi-tenant ERP/API assessment focused on tenant boundaries, injection resistance, error handling, and abuse controls.

OUTCOME

Confirmed high-impact cross-tenant access

HIGH-LEVEL FINDING CLASSES

Time-Based SQLi | Cross-Tenant Access | Path Disclosure | Rate Limiting | CAPTCHA Weakness

Security Assessments 02

Evidence-led assessment outcomes across marketplace, education, and ERP environments.

ChiBox / Brainkets

Web & Mobile

Marketplace and mobile-app assessment covering registration, upload, session, exposed-service, and source controls.

OUTCOME

Confirmed full-system compromise

HIGH-LEVEL FINDING CLASSES

Upload RCE | Privileged Registration | Secret Exposure | Service Exposure | Session Weakness

Lebanese International University

Education

University portal and API testing across public surfaces, sessions, input handling, and application error behavior.

OUTCOME

Confirmed injection and sensitive-data exposure

HIGH-LEVEL FINDING CLASSES

SQLi | Reflected XSS | Error Disclosure | Data Exposure | CSRF | Cookie Security

Phenix Solutions Plus

Authorization

ERP and e-commerce API assessment of account-resource isolation, registration workflows, and exposed internals.

OUTCOME

Confirmed cross-account resource access

HIGH-LEVEL FINDING CLASSES

IDOR / BOLA | Path Disclosure | Config Exposure | Source Exposure | Workflow Weakness

Security Assessments 03

Attack-surface mapping, confirmed findings, verified negative tests, and remediation-focused reporting.

Islamic University of Lebanon

Reconnaissance

Public attack-surface mapping with clear separation between confirmed exposure and verified negative test results.

OUTCOME

Confirmed public data exposure and attack-surface findings

HIGH-LEVEL FINDING CLASSES

Directory Exposure | Data Exposure | Error Leakage | Negative Testing

Assessment Methodology

- Scope and attack-surface mapping
- DNS and certificate-transparency research
- Subdomain, URL, API, and service enumeration
- Authentication and authorization testing
- Source and artifact review
- Manual validation and negative testing

Reporting Standard

- Executive and technical summaries
- Evidence registers and severity ratings
- Attack-chain and impact analysis
- Verified negative-test documentation
- Prioritized remediation guidance
- Clear separation of fact and hypothesis

Selected Security Tooling

Nmap, Nuclei, SQLmap, HTTPx, Subfinder, Gobuster, Masscan, MassDNS, gau, curl, dig, OpenSSL, netcat, apktool, Shodan, CertSpotter, crt.sh, and Wayback.

TECHNOLOGY COVERAGE

PHP / Laravel | Node.js | React | Vue | Next.js | Angular | MySQL | PostgreSQL | AWS / S3 | Cloudflare / R2

Software Portfolio 01

IoT and connected systems lead a portfolio spanning education, finance, real-time communication, payments, and media.

IoT Solutions & Connected Systems

Main Focus

Primary portfolio focus connecting device data, secure APIs, real-time processing, automation-ready services, and monitoring interfaces.

CAPABILITIES

- Device integration
- Real-time telemetry
- Cloud workflows
- Monitoring dashboards

TECHNOLOGY

- IoT
- Real-time Data
- Cloud APIs
- Node.js
- React

Respike - Trading Learning Platform

In Production

A multi-panel learning platform with payments, wallet management, real-time updates, and optimized video delivery for 150+ active users.

CAPABILITIES

- USDT / TRC20 payments
- Bunny.net video
- Wallet systems
- Mobile app

TECHNOLOGY

- Next.js
- React
- NestJS
- MongoDB
- Firebase
- Blockchain

Internship Management System

Delivered

A three-panel environment for administrators, mentors, and students with real-time chat, AI support, task tracking, and analytics.

CAPABILITIES

- Role-based access
- Real-time chat
- AI assistant
- Progress tracking

TECHNOLOGY

- React
- TypeScript
- Express.js
- MongoDB
- Socket.io

Software Portfolio 02

Mobile operations, coaching experiences, and additional production-ready client work.

School Management System

Delivered

An education platform for administrators, teachers, and students with classes, assignments, messaging, and AI-powered insights.

CAPABILITIES

Multi-role portals | Course management | Assignments | Messaging

TECHNOLOGY

Next.js | TypeScript | NestJS | MongoDB

Routee - Taxi Management Platform

Live

A real-time taxi management and booking system deployed to iOS and Android with 20+ active drivers in Venezuela.

CAPABILITIES

GPS tracking | Driver management | Payments | Route optimization

TECHNOLOGY

React Native | TypeScript | Firebase | Google Maps API

Football Coaching Platform

Delivered

A responsive multi-role coaching platform with training video, coach management, performance tracking, and messaging.

CAPABILITIES

Admin and user panels | Training media | Performance tracking | Messaging

TECHNOLOGY

React | Node.js | MongoDB

Skills & Contact

A blended engineering and security toolkit for building, testing, and improving modern digital products.

Offensive Security

Web penetration testing, API security, red team assessments, REST, GraphQL, JWT, OAuth, SAML, and multi-tenant authorization.

Recon & Tooling

Nmap, Nuclei, SQLmap, HTTPx, Subfinder, Gobuster, Masscan, Shodan, certificate transparency, and passive DNS.

Security Reporting

Executive summaries, evidence registers, severity classification, attack-chain analysis, remediation, and negative tests.

Frontend

React, Next.js, TypeScript, React Native, CSS/SCSS, responsive design, Redux, and Zustand.

Backend

NestJS, Express.js, Node.js, REST APIs, real-time systems, authentication, authorization, and Socket.io.

Data & Realtime

MongoDB, Firebase, Firestore, PostgreSQL, real-time synchronization, and data modeling.

Cloud & Delivery

Vercel, Render, Railway, Docker, Git/GitHub, CI/CD, Bunny.net, and Google Maps API.

Architecture & Business

End-to-end solutions, project architecture, security-first design, requirements analysis, budgeting, and client relations.

LET'S BUILD OR SECURE SOMETHING VALUABLE

Available for full-stack engineering, application security, and authorized red team opportunities.

Computer Science Degree - Islamic University in Lebanon

Montreal, Quebec, Canada
